Re: Counterparty Credit Risk Exposure

Please find attached an unaudited report detailing the Corporation's counterparty exposure as of April 30, 2024. The previous report to the Audit Committee was dated February 29, 2024.

There were no new approved counterparties, and there were no rating agency actions of note. HDC's counterparty exposure remains diversified with the largest exposures being with FNMA, FHLMC, and Wells Fargo. The Wells Fargo exposure is primarily in the form of construction letters-of-credit covering 22 projects and five interest rate hedges.

Investments rated double-A or higher were 48% of total investments, versus 47% at the last report. Investments rated triple-B and lower or not rated were 45% of total investments, versus 48% at the last report. All investments rated triple-B and lower or not rated are fully collateralized by high quality U.S. Treasury/Agency securities and/or FHLB letters-of-credit. The weighted average maturity of the investment portfolio was unchanged at approximately 2.30 years.

HDC exposure to liquidity providers and swap providers was unchanged since the last report.
